California Indian Museum, Master Plan And Phase 1 Development

Program: California Indian Museum per AB 716, AB 1768 and its signing message

Description: This project provides funding for overall planning activities and Phase I development for a new California Indian Museum (CIM). Planning documents will include a confirmation manual (for site and project requirements), architectural program, comprehensive site and facility master plan, environmental documents, fully developed schematic plans and renderings for full build out. This project also provides for initial development of a Phase I stand-alone project to inaugurate the CIM. Collaboration with the Native American community for the assessment and preparation of the existing collection and allocation of museum holdings for phase one is planned.

Calaveras Big Trees Sp, New Visitor Center

Program: Calaveras Big Trees SP: New Visitor Center

Description: This project will construct a new Visitor Center of approximately 7,000 square feet at Calaveras Big Trees State Park. The new facility will allow interpretive functions to be moved from an existing, inadequate building which was converted from a Park office and subsequently expanded. The proposed Center will be located where visitors to the Park will easily recognize it and approach it after parking. It will introduce visitors to the Park informatively and positively to facilitate and enhance the park experience. Site development work will include expanded visitor parking and walking pathways. The existing building will be converted back to office spaces for District and Park staff.

North Fork Stanislaus River - Calaveras Big Trees State Park

Program: River Parkways: Opportunity Grants

Description: Eradicate or formalize approximately 1,200 feet (approx. 1 acre) of “volunteer” trails that are causing erosion along most slopes and presenting a safety hazard. Build a fully accessible trail from the River Picnic area to the North Fork Stanislaus River, provide a picnic facility along the banks of the river, and provide ADA compliant picnic and restroom facilities.

Resource Bond Exotic Vegetation Removal

Program: Portion of support budget

Description: In conjuction with Resource Bond Project # R04-5016 and the city of Pittsburg corpmembers will work to prevent the valuable loss of park lands.

The removal of Arundo donax from within Buchann Park will be a preventative for potential riparian habitat degradation. Arundo causes flooding by breaking free in high flows and blocking culverts and small waterway passages. Removal can prevent wide spread environmental and public property flood damage.

The city will provide a 50% match of funds. Resource bond will provide the remainder.

Wild Pig Control, Phase 3

Program: Deferred park maintenance: Natural

Description: This project is on-going to reduce the wild pig population at Mt. Diablo. Trapping feral pigs is required to minimize resource damage to native populations including sensitive plants and animals. Damage to cultural sites by wild pigs has also been documented. Wild pigs have been trapped at Mt. Diablo since 2000. Critically important to continue program so that damage to sensitive species and habitats as well as cultural sites does not occur.

East Brother Island Wastewater Treatment System Project

Program: Small Community Wastewater Grant Program

Description: The project involves the construction of a sewage treatment system that will treat up to 250 gallons of wastewater per day. Waste will be collected from the island's toilets, lavatories, showers and sinks using a four-inch diameter PVC pipe and booster pumps where needed. The waste will first flow into a septic tank for primary treatment and settling. It will then be pumped through a sand filter and a disinfection system before being discharged into San Francisco Bay. The sand filter will cover approximately 200 square feet and will be retained by a masonry wall that rises approximately four feet on the lower side and is flush with the grade on the higher side. Native shrubs and vines will visually screen the wall.

Award Detail

Mill Creek Watershed Management - Resource Bond - Yr 1

Program: Portion of support budget

Description: Mill Creek was recently purchased by Save The Redwoods League and donated to Humboldt Redwoods State and National Parks. The CCC will perform a variety of prescritions that will enhance the overall health of the Mill Creek Watershed. Work will include; thinning of existing timber to encourage faster rates of growth, brushing roads to improve fire safety. Culvert management to avoid large scale erosion from heavy rains, riparian revegetation, stream bank stabilization, water bars on roads that will eventually be decommisioned to avoid sediment flows to streams and the removal of non native vegetation. These pracitices will display the CCC potential to be a significant partner in the land management of this watershed.

Resource Bond Match Lotus Trail

Program: Portion of support budget

Description: CCC will work at Lotus Park constructing a river access along the American River. Trail work will be the width of six feet except where indicated in the trail notes. Trail work shall include all rock work necessary to support the trail and provide proper water drainage. Crew will also install culverts for erosion control. CCC will grade the trail bed using rented equipment as needed. Will coordinate with other contractors and the county to facilitate proper scheduling. Will hire a contractor to pave the viewing stand and the first 350 feet of trail at eight feet in width. Will build safety railings and benches at viewing station, build a monument using wet stone wall construction and other related projects.

D.L. Bliss Sp, Restore And Improve Campsites

Program: Statewide Minors: State Park Systems

Description: This project will improve the campsites at D.L. Bliss State Park by upgrading existing parking spurs, access paths, camping areas and drainage facilities. This work will correct improper drainage designs and rehabilitate worn-out camping facilities. Improvements will include construction of rock retaining walls, installation of asphalt pavement in parking spurs, construction of steps, handrails and drainage structures for the ingress and egress of visitors to campsites. Also included is enhancement of the storm water runoff system and creating retention areas for storm flows. This project is part of the Lake Tahoe Environmental Improvement Program.

Resource Bond Yr 1 - Sunset Shelter Roof

Program: Portion of support budget

Description: The CCC will assist the City of Fresno in removing a wooden roof and installing a corrigated metal roof on the Sunset Picnic Shelter in Woodward Park. The new roof is part of an effort to minimize potential fire damage, ensure safety for the public and provide years of """"""""worry-free""""""""" maintenance. Many ethic groups use the park for weddings, receptions and family gatherings saving the cost of expensive banquet facilities. The City of Fresno is utilizing dollars from other funding sources for the materials and is providing an on-site City supervisor. This project may be duplicated later at other shelters.

Corpsmembers will learn basic carpentry and construction skills from the on-site City supervisor. The shelter roof is approximately 2600 square feet.

Drury-Chaney Grove Trail

Program: Portion of support budget

Description: The project will create an all access - all season trail. The overall project will be divided into 3 phases. This project evaluation covers Phase I and will consist of the portion of trail from the Avenue of the Giants parking area to the Pacific Gas and Electric access road, plus the approaches to two existing bridges. Phase II & III will be completed if future funding is available...
Project 04-6006

The trail is located in the Drury-Chaney Grove, approximately 2.5 miles south of the Jordan Creek exit off US Highway 101. The bulk of the work identified for this project is work need to be accomplished as a trail rehab project: correcting trail grade and drainage issues. The trail work involves installing gravel turnpiking along the length of the trail. Imported gravels will be mixed with local, native soils generated from other construction activities to provide a firm, stable surface for visitors using adaptive equipment. It will also correct drainage patterns along many portions of the trail which have become entrenched over years of use. The turnpike will be constructed with a gently crowned surface elevated above the surrounding ground to create an all-season trail. Periodic portions of the turnpike material will be constructed so that water may pass over the trail (at surrounding grade level) to avoid the impoundment of water and the entrapment of fishes behind the trail turnpike after high water events.

In addition to creating an all season trail, the work identifies: thirteen drain lenses to be constructed at low elevation location, eight trail reroutes to be constructed, totaling 1210 linear feet, construction of eleven retaining walls, ramps to two existing bridges and the installation of hand rails on the bridges/ramps.

This trail project is part of a larger, statewide planning-implementation effort to upgrade existing trails/bridges to a California State Parks System standard. The trail will also create an all access scenic loop trail into an old growth redwood forest. Some of the partners & interest groups include the following:
California State Park System
Humboldt Access Project
Humboldt Redwoods Interpretative Association
Save the Redwood League

this project leverages funding from the sponsor in the form of all materials, and professional trail construction training. Both trail sponsor and technical advisor are credentialed trail construction instructors. There is potential future project work involving the up... (Max 2500 characters returned. Johnson Camp Trail Reroute: 2004

Program: Portion of support budget

Description: Crew will construct new trail reroute through the old growth redwoods at Humboldt Redwoods State Park. This reroute is a replacement trail for the Johnson Camp Trail road. Crew will have the rare experience of building a new trail through an old growth Redwood Forest. The new route will be more ecologically sound, and all measures will be taken to protect the watershed during construction. All construction activities will conform to Endangered Species Protection protocol.

Humboldt County Parks Trails

Program: Portion of support budget

Description: The CCC will assist with the restoration, construction and re-routing of several trails within the Humboldt County Park System. Work will be competed at Van Duzen County Parks and A.W. Way County Parks.

Additionally the crew will assist with the restoration of other areas of the park. This work will entail re-vegetating heavily used areas with native plants. Other restoration work include volunteer trail removal and re-vegetation; installation of native materials for vehicle control and access.

(1) Project is part of a regional or watershed based initiatives.....
Van Duzen County Park is located along the Van Duzen River and is part of a chain of Park parcels that include both County and State Parks. Van Duzen County Park (Swimmer's Delight) is an integral part of this chain. Long term State Park plans include a trail system interconnecting with these county Parks.

(2) Project is leveraged with other sponsor or third party funding sources... This project is being matched with materials & technical supervision from Humboldt County Parks personnel.

(3) Project creates a positive corpsmember learning, training and education experience, facilitated by a strong integration between the district's corpsember development and project units..... The sponsor will assist the instruction of corpsmembers in the significance of the project, the historical background, plant identification, plant handling, plant transplantation techniques, proper and safe use of tools and block and tackle setups.

(4) Sponsor is strongly committed to the CCC mission and goals, recognizing it as a youth development and conservation program.... The sponsor has historically been a strong supporter of the CCC. The sponsor will assist with the instruction of corpsmembers and provide all materials used on the project.

City of Mckinleyville

Hiller Park Playground Fence - Resource Bond Yr 1

Program: Portion of support budget

Description: This project is part of the Regional Recreation Plan for the Mckinleyville Service District. It will provide recreational opportunities as well as environmental exposure for a diverse user base. This project is one of a few that will assist with the development of a Sport Complex and an environmentally sensitive process of waste water management. The role of the CCC will be to develop an inter connectedness with the Sports Complex and the Nature Trails. Part of this project being done by the Youth Serve Program will enable high school drop outs to make a meaningfull contribution while continuing their education.
Phase 1 of this project is fencing to define the area. The Youth Crew will build a split rail fence to accomplish this.
Phase 2 involves the design and construction of a trail through the Mckinleyville Forest Reserve. These projects will be part of the high school curriculum that Northern Humboldt Unified School District's teacher will develop and present in the half day work, half day of classroom model.
There are future phases of work that will involve CCC crews in the planting of wetlands and trail construction and reconstruction.
Partners in this multi phased project are: Northern Humboldt School District, Norther Humboldt School District, the National Guard, Miller Farms, and Fertato Construction Company.
1000 hours will be used by the Youth Corps and the remaining by the Del Norte CCC crews who will possibly work alongside the High School Students.
This is definetly a seed project that will lead to future work opportunities and partnership development.
Project 04-1155

Mckinleyville Sports Complex - Resource Bond Yr 1

Program: Portion of support budget

Description: Cms will install 700 ft of chain link fence that separates the sports complex from the Hammond Trail. A retaining wall will be built in the ball field area for the Backstop area. Vegetation management of the adjoining Forest Preserve will lead to the development of a perimeter trail by the Youth Corps program.
Partners in the development of this community sports complex are Miller Farms Nursery, the National Guard and Furtato Construction company.
This park will become the center of a community.
This project should be considered a seed project because of the adjoining marsh that will be developed in the near future.

Kings Range Trail Rehab

Program: Portion of support budget

Description: The minimum project value $8,208.63 to a maximum of $35,903.49 (CCC Contribution).

Within the Kings Range National Conservation Area the Honeydew Fire impacted approximately 24 miles of hiking, equestrian, and mountain bike trails, including 10 miles of the designated King Crest National Recreation Trail. The 24 miles of trail are and will remain closed to the public until adequate emergency restoration is completed. Some sections of the trail have already been completely obliterated from sliding debris from steep sloped denuded by fire, falling and burned out trees. Other sections require major trail tread stabilization and removal of hazard trees. The Kigs Range receives an anverage of 100 inches of rain a year (second highes rainfall in the lower 48 states), the vast majority falling between November and April. The Kings Range is also known for it's extremely steep terrain and loose, unconsolidated soils. This combination of severe storms, steep slopes, and loose soils are expected to cause substantially greater trail damage this winter. The purpose of the stabilization treatments include the following:

A) Erosion Control Measures Outsloping and construction of grade dips and waterbars are essential to prevent gully erosion along trails. Properly directing water off the trails will not only protect the trails themselves, but evenly disperse the water rather than allow it to pick up sediments during a strong, focused run along the trail bed.

B) Hazard Tree Removal - To ensure the safe passage of visitors using our trail system, hundreds of downed trees will need to be removed from the trail bed. Many trees have already fallen across the trails and hundreds more will undoubtedly fall during this winter's upcoming storms. Many more hundreds of trees immediately adjacent to trails and designated backcountry campsites have been partially burned at the base and will slowly die and rot as a result. They may fall this year, next year, or at anytime. People have died or been seriously injured from falling trees damaged by fire. Removal of obvious dead or dying hazard trees (widowmakers as they are often called) is critical to ensuring reasonable and responsible visitor safety.

C) Trail Tread Reconstruction and Stabilization - Serious trail tread damage has occurred and will continue to occur throughout the winter from falling trees, massive amounts of soil and debris sliding down onto and across the trail bed, deep holes in the trail ... Crystal Creek 2003

Program: Salmon habitat project--DFG

Description: Restore riparian habitat along a 1,770 foot reach of Crystal Creek by the placement of an off-stream watering trough and delivery systems, and construction of 3,118 feet of grazing exclusion fencing; to create 5 acres of riparian area excluded from gazing, and planted with 5 native tree species totaling 2,300 seedlings. Also, eliminate summer water quality degradation and sediment delivery by rectifying 6 riparian zone sites causing degraded summer water quality, with a potential sediment delivery of 120 yards over 5 years.

Salmon Creek Watershed Restoration Project Hs-2003 Streambank Stabilization/Sediment Reduction Project

Program: Salmon habitat project--DFG

Description: Will improve salmonid spawning and rearing habitat by stabilizing approx. 4,915 linear feet of stream banks at 32 sites in the Salmon Creek Watershed that are currently delivering sediment into Class I or II streams and have a potential, if not treated, to continue sediment delivery over time.

Tom Long Creek Tributary Restoration Project, Phase 2

Program: Salmon habitat project--DFG

Description: The objective of this project is to improve spawning and rearing habitat for steelhead trout and to improve water quality and spawning habitat for chinook salmon. This will be accomplished by reducing a major source of sedimentation along a 1,200-foot section of a main tributary to Tom Long Creek. The project will include: resloping 250' of streambank and installing willow mattresses, installing eight willow baffles, placing 15 yards of boulder/log bank armor; installing six complex instream scour/cover structures; and revegetating the project area with 2,000 Douglas fir and alder seedlings.

Moon Creek Barrier Modification And Habitat Enhancement Project

Program: Salmon habitat project--DFG

Description: Improve fish passage and instream habitat in Moon Creek by modifying five log barriers and constructing 10 log structures. Barrier modifications will open up more than 2 miles of spawning and rearing habitat for salmonids. Five simple and five complex log structures will enhance pool quality and depth, provide cover for juveniles and adult salmonids, help entrain woody debris, and sort spawning gravels. Instream habitat restoration will take place on 2,000 feet of Moon Creek.

Rocky Gulch Salmonid Access And Habitat Restoration Project

Program: Salmon habitat project--DFG

Description: Restore coho salmon and steelhead production from Rocky Gulch by 1)replacing the tide gate with a structure that allows fish passage, 2) restoring an estuary above the tide gate to provide high quality salmonid rearing habitat, 3) rehabilitating the channel traversing the pasture to assure suitable fish passage, a riparian corridor, and better drainage of tributaries to Rocky Gulch, 4) set back dikes to restore a 100 ft. steam corridor.

Economic Value For Watershed Management Techiques

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The study will develop a method to evaluate the monetary value derived from watershed improvement projects. The study will review watershed enhancements such as creating and expanding open spaces, improving flood protection, increasing groundwater recharge, providing passive recreational facilities, improving ground and surface water quality, preserving habitat and promoting multipurpose land use. Upon completion, a user-friendly spreadsheet model will be available to evaluate a project's total economic benefits in net present value annualized over the project's life span, resulting in a benefit/cost ratio for the project.

Peck Water Conservation Park

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The proposed project is a planning study of low-impact recreational, educational, San Gabriel River watershed and wildlife/habitat improvements at Peck Water Conservation Park and the Rio Hondo extending from Peck Park to the area near Whittier Narrows. The plan will identify and plan opportunities for bicycle, equestrian and walking/running trail improvements and access/connectivity to existing trails in and adjacent to the project area. It will also identify and plan opportunities for interpretive signage to promote park history as a reclaimed gravel quarry, and how it functions in the flood management plan for the watershed.

Forest Gateway Interpretive Center Park Bond

Program: Portion of support budget

Description: He CCC will be assisting the City of Azusa in preparing their Forest Gateway Interpretive Center at the entrance to Azusa Canyon. This site is adjacent to the San Gabriel River and serves as the physical entrance to the Angeles National Forest. Over 7 million visitors pass through this highway on an annual basis. All visitors entering San Gabriel Canyon must stop at the Forest Service Entrance Station (proposed new Interpretive Center) to purchase an """"Adventure Pass""""" which allows visitors to park in the canyon.
This project involves the construction of a 1,500 sq. Ft. Interpretive Center, funded by Azusa Light & Water, on a 5 acre parcel on the east side of Hwy 39. Surrounding the Interpretive Center will be a native plant garden, complete with native vegetation landscaping, meandering walking paths, and outdoor exhibits.
The project will consist of habitat protection, restoration and bank enhancement of the historical California-American Water Company Canal, removal of non-native vegetation that impedes the water flow, hand excavation of existing riparian soils needed to create a detention basin and then stock piled for use in the rehabilitation planting areas and seed collection for re-development of the natural riparian habitat.

This project is part of San Gabriel Watershed Management Plan and the Los Angeles County San Gabriel River Master Plan and involves multi-juristictions, such as the city of Azusa, Azusa Light & Water (Project Partner-Matching Funds), USDA Forest Service, MWD of So. Cal., North East Trees, San Gabriel Mountains Regional Conservancy(SGMRC), So.Cal.Edison, and LA County Reg. Park and Open Space Dist.

This is a seed project with partner SGMRC who in turn will be partnering with the city of Azusa. The CCC will be providing a contribution of $25,000 in labor funded by the CCC Park Bond. (1,497 hrs)

City of Bellflower

Bellflower Riverfront Park

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: This project will prepare a plan for the development of a 15.5-acre regional, low impact recreation area adjacent to the San Gabriel River. Proposed improvements include a paved bikeway, landscaping, park benches, lighting, and informational signing. The project area is located within the Edison (11.4 acres) and Los Angeles County Flood Control District (3.9 acres) right-of-way between Somerset Boulevard and Alondra Boulevard. It sets forth a connection to the San Gabriel River bikeway via an existing pathway currently linking the regional bikeway to Alondra Boulevard.

Utilities At Malibu Creek - Resource Bond

Program: Portion of support budget

Description: This 2 part project is funded by straight reimbursment from California State Parks and funded by (Resource Bond Allocation) CCC will be doing the following as part of project # R04-4527.

1. The initiative that is set forth to partially fund this project through Resource Bonds will effect the park like environment. CCC will be reconstructing pathways for public access and safety.

2. CCC will also be constructing landscape appearance in front of the entrance to the Park for beutification of the land and appearance it will have.

3. CCC will take part in relocating the main water supply so that the new built restrooms will be in operation for public access.

4. CCC will also be planting native species to the suorounding area in various locations.

5. CCC will also be providing labor to help construct the new Angeles District, State Parks 3 Part trailer installation.

6. CCC will also be installing Storm water protection placements as needed throughout the duration of the project.

Malibu Creek Sp, Removal Of Corral Canyon Residences

Program: Statewide Minors: State Park Systems

Description: This project will demolish, remove, and dispose of two existing residences and associated items in the Corral Canyon area of Malibu Creek State Park. After removal of the residences and the other items associated with the dwellings, the impacted areas will be restored to a “pre-development” native condition. Included in demolition and removal are all dwelling structures and appurtenances, concrete flatwork, roads, cisterns, water storage tanks, any existing piping, water tanks, and non-native trees and plants. The site will then be re-graded to its approximate previous condition and re-planted with native vegetation.

Claremont Hills Wilderness Loop

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Acquisition of 240 acres (the Noland Property) in the Claremont foothills will expand the 1,200-acre Claremont Hills Wilderness Park (CHWP) and complete the Wilderness Park trail loop. The project goals include 1) trail signage and wildlife educational components, 2) protection of the rich biological resource values present in the Claremont foothills 3) unrestricted public access to the entire CHWP loop trail for both recreational and educational purposes, and 4) public education on the biological, historical and cultural significance of the area through interpretive signage. Upon acquisition, the 240 acres will be added to Claremont Hills Wilderness Park and managed subject to the CHWP Management Plan. The goal of the management plan is to manage the Claremont Hills Wilderness Park so as to preserve its natural characteristics while providing all visitors opportunities for passive and recreational enjoyment of the park's visual qualities, diverse vegetation, wildlife, and cultural resources.

Children'S Native Paint Garden

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Rancho Santa Ana Botanic Garden (RSABG) seeks a grant to complete planning for a ¾ acre Children's Native Plant Garden for children ages 4 – 7, considered by education specialists to be a critical age for learning. The Children's Garden will highlight regionally significant indigenous plant communities (riparian, chaparral, oak woodland, and meadow/grassland) and will incorporate interpretive exhibits on plant-animal interactions

City of Compton

Compton Creek

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The goal of the Compton Creek project is to transform the concrete channel that divides the City into a functioning recreational area that enhances the watershed and provides a focal point for residents and the region to embrace with pride. In this process, the City wants to make sure the project is consistent with existing plans and guidelines governing the Los Angeles River, and that it reflects current landscape trends and delivers maximum connectivity to the region.

Rio Vista Park Restoration And Conservation

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Rio Vista Park project is a proposal to restore native vegetation to the park, increase access to the park via pedestrian and bicycle trails, and provide interpretive displays on the historical significance of the area surrounding the park and the adjacent Rio Hondo River. The construction of new interpretive environmental education classrooms and the reconstruction of an existing ADA compliant ramp that links the park with Rio Vista School are also proposed. The project improves a public open space resource, enhances a riverfront greenway, provides enhanced accessibility to trails, and is a significant historic resource to the watershed.

Glendale/Le Mesnager Improvements

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: This matching grant provided $200,000 to the City of Glendale to implement construction drawing for improvements at the Le Mesnager historic site in the Deukmejian Wilderness Park. The improvements are for the purposes of seismic stabilization and rehabilitation of structures on the site, and for the creation of interpretive displays. Through these improvements, the Le Mesnager barn will become an interpretive center.

Gordon Mull Property

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Gordon Mull Property, 29 acres of hillside open space property in the San Gabriel Mountain foothills north of Glendora, contains two blue-line streams and connected wetlands, sensitive plant communities including coastal sage scrub and walnut woodland and 8 identified sensitive plant and animal species.
The project will increase the linkage to the Foothills Wildlife Corridor and create interpretative nature trails linked to the existing foothill trail system. The property consists of a north/south trending ridge and slopes to the canyon bottoms of two flanking canyons on the east and west: Mull Canyon and Gordon Canyon.

Keiser Park Renovation Windsor Resources Bond

Program: Portion of support budget

Description: CCC will assist in constructing a garden for the Santa Fe Dam Nature Center's Grand Opening. There will be some sidewalk removal to be replaced with decomposed granite, trenching for and installation of irrigation, planting of native plants and some small tree removal and site
improvement. The Nature Center harbors the natural beauty of the San Gabriel Valley's native habitat that has been preserved there for thousands of years.

This project will provide corpsmembers with education on landscape design by Jeff Hutchins, a licensed Landscape Architect that will be on-site. Also on-site teaching corpsmembers about plant and wildlife identification is Ramona Rubio, who has a PhD in Cultural Anthropology.

This project is a seed project with CCC partner (SGMRC) San Gabriel Mountains Regional Conservancy, who is in the process of tying the CCC into a $700k grant for future conservancy projects. CCC will provide 2,095 hours of labor with the funding of CCC Park Bond for $35,000.

This project is part of SGMRC's mission to promote the preservaton of land and\or buildings for historic, educational, ecological, recreational, scenic, or open space opportunities.

San Jose Creek Bicycle Trail Phase Ii

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The San Jose Creek Bicycle Trail Phase II consists of the construction of a Class I bicycle trail from the San Jose Creek Bike Trail at Workman Mill Road to the San Gabriel River Bicycle Trail. The project closes the existing gap between these two major trails in the Los Angeles County area. In order to accomplish this gap closure, two bicycle bridges will be constructed, one over the San Jose Creek and the other over the San Gabriel River. In addition, the project will enhance the surrounding landscape and hardscape while also improving the slope protection and drainage in the area.

San Jose Creek Greenway Improvements Phase Ii

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: This project will expand upon work already in progress along San Jose Creek between Workman Mill Road and the San Gabriel River confluence through Los Angeles County Proposition A funding. The ultimate goal is to convert the degraded upper slopes of San José Creek to an upland habitat with interpretive signage, native plants for shade and habitat, and trained community stewards. Phase II will provide interpretive signage, train community restoration stewards through three volunteer events, and plant 225 additional native plants on drip irrigation with volunteer and staff labor. The proposed landscape improvements will enhance the recreational aspects of the creek trail and the strong education and outreach component of the project will contribute greatly to community awareness of the hydrology and natural resources of San Jose Creek.

Puente Creek Nature Education Center

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The City of La Puente proposes acquisition a vacant parcel along Puente Creek on which the Nature Center would be located. Situated between an existing school and the channelized creek, the sheltered education center will provide the local community as well as the students of the surrounding school districts the opportunity to gain knowledge of environmental issues that face our communities. The proposed facility will be an area which schools and other community organizations will be able to access for practical learning opportunities and passive recreation.

Woodland Duck Farm

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The RMC Board approved a Proposition 40 (Prop 40) grant of $1.3 million to the Watershed Conservation Authority (WCA) on April 17, 2003 for the Woodland Duck Farm project. The purpose of the Prop 40 grant as approved is to complete the acquisition and to carry out necessary improvements to the property consistent with the use of the main house for office space. It is now anticipated that additional professional services related to the acquisition may be necessary.

Woodland Duck Farm Planning

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Acquisition of the Woodland Duck Farm property for open space purposes offers potential benefits to the local community and to people throughout the region. These potential benefits include access to an extensive network of open space, passive recreation opportunities for a local population of 350,000 people, an opportunity for watershed education, access to over 6 miles of local and river trails, public access to riverfront habitat, flood protection and enhanced water quality.
The Woodland Duck Farm is located along the San Gabriel River just north of the confluence of the San Gabriel River and San Jose Creek. The property consists of two portions: 45-acres along the west bank of the San Gabriel River and 12-acres on the eastern side of the 605 freeway.

El Dorado Regional Park Wetlands Feasibility Study

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The City proposes to look at the potential of treating San Gabriel River water in a constructed wetland which may be located in the northwest corner of El Dorado Park. The treated water would then be used to replenish water in El Dorado Park lakes, and finally being released back into the San Gabriel River. Currently, the lakes are on a closed system with water circulating between the lakes.

Rancho Los Alamitos Native Garden Restoration

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Native Garden Restoration Project implements the recommendations of a comprehensive Master Plan for the site and specifically a Landscape Restoration Plan. Completion of the project requires upgrading irrigation, drainage and electrical systems; renovating pathways and providing ADA access; pruning of specimen and perimeter trees and shrubs rehabilitation of artifacts, and the development of an interpretive training and visitor presentation program. The project improves a public open space resource, promotes stewardship of landscape through interpretive opportunities, encourages sustainable growth, and is a significant historic resource to the watershed.

Wrigley Heights Acquisition

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Wrigley Heights acquisition project is a 20-acre site adjacent to the east bank of the Los Angeles River, immediately south of the 405 Freeway and north of Wardlow Road. The majority of the site was formerly used as an oil and water separation facility for a consortium of oil companies and is currently considered a Brownfield site. The project application specifies that the landowner will clean up the contamination as part of the sale price. Once acquired, it is proposed that the site be restored as freshwater wetlands surrounded by high and low riparian woodlands and other publicly accessible open space uses. The strengths of this project were in the urban, recreational, and open space factors as well as educational and cultural considerations. There is also significant potential to restore natural habitat on the site. The Coastal Conservancy has identified the project area as a potential wetlands restoration site as part of the Southern California Wetlands Recovery Project. It is also currently listed as a potential project site in the Los Angeles River Master Plan. Further, this project is a key link to the 51-mile Los Angeles River Parkway.

Award Detail

Dominguez Gap Wetlands Multiuse

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Dominguez Gap Wetlands Multiuse project proposes to modify two existing retention basins located on each side of the Los Angeles River to create 12 acres of functional wetland and riparian habitat, improve water quality and recharge, create passive recreational facilities, including trails, shade structures, and interpretive signage, along with providing educational features, and improve aesthetic values. Furthermore, this project provides direct access to the 51-mile Los Angeles River Parkway.

Rancho Los Cerritos Historic Landscape Restoration

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Rancho Los Cerritos, built in 1844, is a National, State and local historic landmark and is one of the few remaining two-story adobes standing in Southern California. The Rancho Los Cerritos Historic Landscape Restoration involves the development of conceptual drawings, plans and specifications for restoration of a 33,350 square-foot arroyo, improvements to perimeter fencing, landscape and drainage, and renovation of a California native garden that was designed by noted landscape architect Ralph Cornell. The project also includes the design of interpretive panels and brochures to enhance the public's understanding of native plants and the relationship between historic and diverse communities of the Rancho and the Los Angeles River. The proposed improvements will assist in fulfilling Rancho Los Cerritos' Master Plan for continued preservation of the historic grounds and improved educational opportunities. The project improves a public open space, promotes stewardship through interpretation and kiosks, encourages sustainable growth, and is a significant historic resource to the watershed.

Deforest Park/Long Beach Park - Resource Bond

Program: Portion of support budget

Description: The CCC will provide labor for this project with Resource Bond allocations. The Departments partnership with the community and the California Conservation Corps is to perform the following improvements to the Nature Center. This sponsorship will benefit all parties by way of the following.

1). The protection of plant and animal life and those habitats that promote bird nesting, small animal migration into the area and offer an educational element for the surounding community and schools.

2). The methodology used to promote this beutification project and the publicity surrounding it has solicited community involvement. Members of the Audubon society and othercommunity leaders concerned with the aspects of the project have been consulted and are active participants.

3). The Audobon Society has offered to help demonstrate to the California Conservation Corps members what to look for, what to protect and how to coexist with nature in an urban park environment that is being restored to its natural state.

Cornfields Project, Immediate Public Use And General Planning

Program: Cornfields Project: Immediate Public Use and General Planning

Description: This project will provide for the design and installation of immediate public use (IPU) facilities to launch a major urban unit of the State Park System at the Cornfields in Los Angeles. Funding will be used to make the park available to the public: installation of interpretive and educational features, parking, restrooms, landscaping for passive and active recreational use, and miscellaneous site improvements. The project also provides funding to support Department efforts to work with local constituents on long-range general planning for the park.

Center For Community Forestry

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The Conter for Community Forestry at Coldwater CAnyon Park will showcase state of the art examples of sustainable green building and native plant landscape design while prviding a forum to teach teh residents of Los Angeles about living lightly on the earth and watershed management. The Conference Center will be available to host a variety of seminars and conferences with multi-media facilitation equipment. A nursery will propagate native plants and fruit trees for use throughout the Los Angeles basin in support of their citizen forestry program. The Parking Grove will not only serve as the entry to the Coldwater Canyon Park, but also be a demonstration of stormwater Best Management Practices, retain stormwater in a 250,000 gallon cistern under the parking lot, all while preserving heritage trees.

Lynwood Meadows

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Lynwood Meadows is a proposal to rehabilitate a vacant city-owned property as a park. The project is located in a densely populated community. The majority of the park is proposed to be open space, except for a few picnic areas, gazebos, a sand box and a cardio park. Partnerships will be forged with local environmental groups for planning and implementation of the reintroduction of native vegetation.

City of Monrovia

Monrovia Hillside Wilderness Perserve

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Wrigley Heights acquisition project is a 20-acre site adjacent to the east bank of the Los Angeles River, immediately south of the 405 Freeway and north of Wardlow Road. The majority of the site was formerly used as an oil and water separation facility for a consortium of oil companies and is currently considered a Brownfield site. The project application specifies that the landowner will clean up the contamination as part of the sale price. Once acquired, it is proposed that the site be restored as freshwater wetlands surrounded by high and low riparian woodlands and other publicly accessible open space uses. The strengths of this project were in the urban, recreational, and open space factors as well as educational and cultural considerations. There is also significant potential to restore natural habitat on the site. The Coastal Conservancy has identified the project area as a potential wetlands restoration site as part of the Southern California Wetlands Recovery Project. It is also currently listed as a potential project site in the Los Angeles River Master Plan. Further, this project is a key link to the 51-mile Los Angeles River Parkway.

Temescal Canyon Master Plan Phase Ii

Program: Capital outlay and grants

Description: The Mountains Recreation and Conservation Authority (MRCA) has been developing a complete master plan for the facilities at Temescal Gateway Park. Initial funds were granted for this project as Temescal Canyon Master Plan, Phase I. Phase II will fund improvements to the facilities that that have been identified as high priority needs and that will generate an immediate increase in the usability of the facilities. Significant improvements will include the reconfiguration of the BBQ patio/picnic area outside the newly remodeled dining hall and the amelioration of the adjoining Woodland Terrace. Rehabilitation of these areas will create a nice sequence of space from a lovely outdoor lawn, to a charming patio, and finally into the rustic dining hall. Improvements at Temescal are targeted to benefit both the MRCA's own education and interpretation programs and to make the park more appealing and usable to outside groups.

Temescal Master Plan Phase I

Program: Capital outlay and grants

Description: The Mountains Recreation and Conservation Authority (MRCA) is undertaking the development of a complete master plan for the facilities of Temescal Gateway Park. The MRCA seeks to enhance the current conference center uses to generate a higher level of public use. Staff will consult with various meeting and conference professionals to determine what levels of accomodations and meeting rooms would be ideal, and how to make the interface of all users as safe as possible. The funds will cover both consultant services and initial improvements to the facilities including paving of roads and parking areas, landscaping and building upgrades. Improvements will benefit both the MRCA's own education and interpretation programs and the programs of outside groups.

Tejon Park Expansion And Una Lake

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Una Lake is a natural sag pond, which is an enclosed depression formed where active or recent fault movement along the San Andreas Fault resulted in impounded drainage. This proposal is for acquisition of Una Lake and surrounding wetland and hillside properties for preservation as natural open space and the expansion of Tejon Park. It encompasses approximately four acres of a 68-acre parcel located along the east side of Sierra Highway approximately ¼ mile south of Avenue S. The pond is primarily open water habitat, although portions of the flooded edges support riparian woodland and scrub habitat. The lake supports several species of waterfowl and fish. Una Lake provides foraging and nesting habitat for red-winged blackbird, mallard, belted kingfisher, double-crested cormorant, ruddy duck and American coot as well as several red-eared sliders and introduced turtle species.

Washington Park Master Plan Phase I

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Washington Park Master Plan Implementation Phase I focuses on the development, including rehabilitation and restoration, of portions of Washington Park pursuant to the Washington Park Master Plan. The scope of the project includes the rehabilitation of an arroyo, the development of an interpretive center, development of the historic El Molino Walkway, restoration of a historic picnic area and the construction of a demonstration garden. The project was developed in partnership with Friends of Washington Park and the Theodore Payne Foundation. The project improves a public open space resource, promotes stewardship of landscape through interpretive opportunities and kiosks, encourages sustainable growth, and is a significant historic resource to the watershed.

Zone 1 Ditch Channel Enhancement

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Zone 1 Ditch channel (Lario Creek) was constructed to divert water from the San Gabriel River through the Whittier Narrows Nature Center area to facilitate groundwater recharge into the Rio Hondo Spreading Grounds. The goal of the Zone 1 Ditch Channel Enhancement Project is to perform stream bank stabilization and restoration while increasing the channel's ability to divert water for groundwater replenishment. Stream bank stabilization and restoration will be accomplished using bioengineering techniques, removing invasive vegetation, and revegetating with native plants. Enhancing and restoring the vegetation will also promote ecological diversity, provide additional wildlife habitat, and increase its educational value. The project area is host to over 250 species of birds. The federally endangered least Bell's vireos (Vireo bellii pusillus) and Special Status Species like the double-crested cormorant (Phalacrocorax auritus) and Cooper's hawk (Accipiter cooperii) are known to frequent the project area.

Vegetation planted to promote bank stabilization will increase the percentage of the local urban forest thereby improving air quality, increasing shade and comfort, and supporting riparian and aquatic habitat. The project will contribute significantly to the recreational opportunities for the communities of South El Monte, Pico Rivera, Whittier, and nearby communities

Sycamore Park Trail Development

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The project would develop the first trail increment of the City's five site city-wide trail system. Sycamore Canyon Park is an existing 50 acre city park that provides active recreation along with an undeveloped trail that begins at the existing parking lot near Golden Springs Drive and travels through undeveloped areas east toward Diamond Bar Boulevard. The undeveloped trails follow near an existing stream and four acres of walnut woodlands capable of supporting California Gnatcatcher and the Arroyo Toad. The proposal would result in a clearly defined path surfaced with decomposed granite and redwood headers. Railroad tie steps will be installed along steeper grades to improve user safety. View decks are proposed overlooking the stream and near the trailhead at Diamond Bar Boulevard.

Vincent Lugo Park Master Plan

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Vincent Lugo Park Renovation is a proposed Master Plan project that will explore renovation of the park, enhance the interface with the Alhambra Wash and provide environmental education opportunities for the community and the neighboring McKinley Elementary School. The project improves a public open space resource, enhances a riverfront greenway, provides enhanced accessibility to the access road along Alhambra Wash, and promotes watershed stewardship through the creation of an educational footpath between the park and an adjacent elementary school.

Watershed Education In Multi-Lingual Communities

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Watershed Education in Multi-lingual Communities Program proposes to train Mexican American Opportunity Foundation (MAOF) staff in watershed stewardship for future integration of environmental education into Naturalization Services programs for low-income, urban communities. This program will provide low-income and immigrant communities exposure to environmental issues in their native languages. Participants would study the relationship between the effective use or sustainability of natural resources and their quality of life.

Think River!

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: THINK RIVER! is a program focused on developing youth watershed stewardship through the planning and implementation of three environmental education involvement opportunities: a High School Student Mentor Program, a Teacher Education Workshop, and a Youth Watershed Conference. This program will provide youth educational opportunities to study the relationships of water quality, water supply and use, and habitat with their community. It will provide youth oriented public involvement in implementing a Watershed Plan and will build long-term partnerships with youth, teachers and school districts for future environmental education enhancement.

Santa Fe Springs Park Master Plan

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The project involves preparation of a master plan for Santa Fe Springs Park and assessment of the feasibility to expand the existing 14 acre park north with approximately 13 new park acres. The park is directly adjacent to the San Gabriel River and supports active and passive recreation. The feasibility study would look at developing a nature sanctuary on parcels north of Telegraph Road that are also directly adjacent to the San Gabriel River.

Cha Wot Nature Preserve

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Approximately 32-acres of hillside open space, presently owned by Signal Hill Petroleum, has been identified by the City of Signal Hill as a possible site for a nature preserve. The project protects threatened open space from development, expands existing public open space, provides enhanced access to a local trail system, and is a significant historic resource for the watershed.

The feasibility study described in the proposal consisted of a geotechnical investigation, appraisal and preservation planning

City of South Gate

South Gate Riparian Habitat Restoration

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The South Gate Riparian Habitat Restoration Project site is in the cities of Lynwood and South Gate, near the convergence of the Interstate 105 Freeway, Interstate 710 Freeway, Imperial Highway, and the channelized Los Angeles River. Impacts to the area from these historic development projects have severely degraded the environment and quality of life from this park-poor area. This project will repair some of the damage done to the habitat of the area when the Los Angeles River was channelized by constructing a 12.5 acre functional seasonal wetland, bird habitat, and much needed accessible open park space (Exhibit A). The seasonal riparian wetland will also serve to filter stormwater runoff, improving water quality in the watershed. In addition to the 12.5 acre seasonal riparian habitat creation, this project will utilize interpretive signs scattered along short trails to be constructed on the site. The site will also provide visual enhancement to a local LARIO bike trail and access road.

City of Topanga

Topanga Sp, Rehabilitation Of Sassafras Nursery Trespass

Program: Statewide Minors: State Park Systems

Description: This project will restore the Sassafras Nursery trespass site in Topanga State Park to its natural condition. The project will include demolishing and removing existing structures and rubble, locating and removing existing waterlines and septic systems, assessing and remedying any hazardous materials and associated spills or soil contamination, and removing non-native plants. After the removal of these items, the adversely affected portions of the site will be re-graded to an acceptable “pre-trespass” condition and re-planted with native vegetation.

Galster Park Project

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: Galster Park is a wilderness park containing mostly undisturbed riparian and upland habitat with trails and camping facilities. The proposed facilities will provide a wilderness education experience for children in the San Gabriel Valley in a controlled setting. It is anticipated that extending the trails at Galster will eventually allow for trail connectivity with the nearby City of Walnut trails and trails from Los Angeles County (Skyline/Schabarum).

* City Of La Mirada - Creek Park Restoratation

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The City of La Mirada submitted two applications and the County of Los Angeles Department of Public Works submitted one application for relatively similar projects either in scope or in geographic range. The two applications from the City of La Mirada deal with construction improvements to the three city parks along La Mirada Creek, while the County's application is for preparation of a project concept report. RMC proposes that funding be used to prepare a joint master plan, or similar document, for the entire geographic reach of the three projects. The master plan could then be used to implement projects as funding becomes available.

Improvements To Pio Pico State Historic Park

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The purpose of this project is to create educational materials that will inform visitors of the existing California native gardens at Pio Pico State Historic Park. State Parks is currently transplanting non-native vegetation and replacing it with native plant species in preparation for the re-opening of Pio Pico State Historic Park following three years of renovations.

El Pueblo To Elysian Park Heritage Parkway

Program: Capital outlay and grants

Description: This grant provided funds to the Center for Law in the Public Interest and the Natural Resources Defense Council to conduct research and planning for a Heritage Parkway that would connect the El Pueblo de Los Angeles State Historic Park to the City of Los Angeles' Elysian Park and the new Cornfield State Park. The parkway would unite cultural, historical, recreational, and environmental resources key to the development of Los Angeles.

Minor Capital Outlay

Program: Capital outlay and grants

Description: The Mountains Recreation and Conservation Authority operates and manages multiple park sites and open space areas for the Santa Monica Mountains Conservancy. In order to provide high quality park experience for park visitors, minor site fixture upgrades are often necessary. These include signage, park benches, picnic tables, interpretive displays and other park amenities. Often, the funding sources available for the ongoing maintenance of parks are not sufficient to include the replacement or purchase of such items.

Lacc-Mulholland Scenic Parkway

Program: Capital outlay and grants

Description: The Mulholland Scenic Parkway winds along the spine of theSanta Monica Mountains, and is considered a treasured resource for Los Angeles and a popular destination for tourists. Day to day maintenance of teh scenic overlooks along the Mulholland Scenic Parkway is performed by the Department of Parks and Recreation. The MRCA rangers have augmented teh basic maintenance provided by the City, and periodically have conducted community supported clean up projects along the Scenic Parkway. MRCA in collaboration with the Los Angeles Conservation Corps (LACC) will regularly remove and maintain the entire scenic parkway.

Tuna Canyon

Program: Capital outlay and grants

Description: The Tuna, Pena, and Pierda Gorda Canyon Watersheds contain some of the most remote coastal watersheds in the portion of the Santa Monica Mountains that is close to urban areas. This 240-acre portion of the 1,255-acre overall Tuna Canyon Park acquisition contains dense chaparral, with pockets of oak woodland, grassland, and coastal sage scrub. Tuna Canyon Park links over 18,000-acres of contiguous protected open space from Topanga State Park west to Las Flores Canyon. More than half of the property lies within Los Angeles County Significant Ecological Area Number 10. Deep canyons and ridges support a rich mosaic of coastal Southern California plant communities including sycamore riparian woodland, oak woodland, coastal sage scrub, and native grasslands. Tuna Creek, one of the most pristing aquatic habitats in the Santa Monica Mountains, courses through the eastern end of the property to the ocean.

River Center And Gardens Improvements Phase I

Program: Capital outlay and grants

Description: The Los Angeles River Center and Gardens has a myriad of public uses including offices for the Mountains Recreation and Conservation Authority (MRCA) and other non-profit environmental and educational organizations, educations programming run by the MRCA's Education and Interpretive Division, rental space for meetings and special events, and daily guests to the Visitor Center. Before its acquisition in the winter of 1998, the facilities had been vacant for over seven years, and many deferred maintenance problems developed. Since 1998, the MRCA has undertaken both restoration of existing structures and other significant improvements. In an effort to bring the Los Angeles River Center and Gardens up to its highest potential and to serve a greater number of users, the MRCA is developing a new master plan for the property. Staff is consulting with various meeting and event planners to determine how best to upgrade the facilities. The current grant is being used for consultant services and improvements to the facilities including kitchen redevelopment, creation of new meeting rooms, installation of additional exterior benches, tables, and landscape amenities, and upgraded plantings.

Gateway Cities Cog Bike Trail Expansion

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: With funding from the RMC, the Gateway Cities Council of Governments (COG) would be able to extend the City of Bellflower work westward through the City of Paramount and eastward in the City of Artesia and, if desired, Cerritos. The COG would engage a consultant to review and update the feasibility study, including coordination with the plans and policies of the MTA, the Orange Line Development Authority and the affected cities as well as the RMC.

Trail, Bike Path, Access, Signage 7 Low Impact Rec. Acess Improvement

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The WCA has identified trail access and signage improvements as a critical need for the river corridors in our territory.
RMC considers this project a critical element that should be addressed in order to encourage recreational activities throughout the watershed, provide safe and well-defined access points and connection, and promote nearby watershed projects.

Watershed Improvement

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The LACC gives young adult corpsmembers an opportunity to develop their education, work and leadership skills. They alternate between a week of work and a week of school as part of the program requirements. The LACC is a lead agency and local model for Building Up Los Angeles, a project of AmeriCorps, the National Service program.
LACC will be designated to work on certain projects within the San Gabriel and Lower Los Angeles River watersheds.

Sg Watershed Habitat Restortation Assessment

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The San Gabriel Mountains Regional Conservancy has proposed the development of a watershed plan to address the Upper San Gabriel River, Walnut Creek, and San Jose Creek Subwatersheds. The plan anticipates working with stakeholders and consultants to establish reasonable habitat restoration goals and objectives. This project will result in an immediately useable plan to assist the RMC in the development of the habitat plan.

Westridge-Canyon Back Wilderness Park

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The acquisition of Westridge-Canyon Back Wilderness Park, formerly know as the Eastport property, culminates over a decade of preservation efforts by Yaroslavsky, the Conservancy and many surrounding community groups. Eastport was the single largest privately owned open space remaining in the City of Los Angeles. The property had at one time been permitted for the development of over 500 homes. It had also been slated to be used as access for potential Rustic and Sullivan Canyon landfills until Yaroslavsky successfully removed the property from the Sanitation District's map.

The park is contiguous with the 20,000 acre urban wilderness park system known as the """"""""Big Wild"""""""". The property is bordered by upper Mandeville Canyon, Sullivan Canyon, Mission Canyon and the Conservancy's San Vicente Mountain Park. The dominant feature of the site is a north-south ridgeline, known as the Westridge fire road. This fire road has long been used by hikers and mountain bikers, and is accessible from both the San Fernando Valley and the West Side. Westridge-Canyon Back Wilderness Park will now be the Conservancy's eastern gateway to """"""""Dirt"""""""" Mulholland.

New Schools Better Neighborhoods Joint Use Park Development Project

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: New Schools/Better Neighborhoods (NSBN) is a civic advocacy organization formed to promote a 21st Century vision for California's urban school districts: new schools should be centers of neighborhoods and likewise, neighborhoods adn communities should serve as centers of learnining. NSBN will promote the concept of designing smaller school facilities that can build upon and accommodate existing community land and facilities to save on time, money, land, and other resources. NSBN's goal is to create small, neighborhood-centered schools that function as community centers and also reduce sprawl development and suburban migration by more efficient and imaginative use of limited urban land.

Temescal Master Plan Phase I

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The Mountains Recreation and Conservation Authority (MRCA) is undertaking the development of a complete master plan for the facilities of Temescal Gateway Park. The MRCA seeks to enhance the current conference center uses to generate a higher level of public use. Staff will consult with various meeting and conference professionals to determine what levels of accomodations and meeting rooms would be ideal, and how to make the interface of all users as safe as possible. The funds will cover both consultant services and initial improvements to the facilities including paving of roads and parking areas, landscaping and building upgrades. Improvements will benefit both the MRCA's own education and interpretation programs and the programs of outside groups.

West Mulholland Trailhead

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The 61.4-acre 21000 Mulholland property gives San Fernando Valley residents easy access to the 20,000-acre “Big Wild”—the largest urban wilderness area within the United States, fulfilling Governor Gray Davis’ urban parks initiative. Combined with the recently-acquired 320-acre Avatar property, the properties provide the last portal to Topanga State Park. As a result of these major acquisitions, the undeveloped character of “dirt” Mulho· 61.4 acres of pristine California mixed oak-walnut woodland and coastal sage scrub vegetation
· Provides easy access for 2.1 million residents of the San Fernando Valley and Westside areas of Los Angeles into the 20,000-acre natural area known as the Big Wild. Provides the last major portal into Topanga State Park and Mulholland Gateway Park.
· The full service trail head will include state-of-the-art environmentally sustainable elements including solar lighting, drip irrigation and self-composting toilets.
· A joint project of the Santa Monica Mountains Conservancy and California State Parks
· With site improvements, the park will provide visitors with a parking area, restrooms, interpretive displays, picnic areas and multiple hiking, biking and equestrian trails
lland Drive, the last remaining sample of rural 1920’s Los Angeles will be preserved forever.

Mulholland Scenic Overlook Rehabilitation

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: Thsi grants was awarded to the MRCA for the purpose of rehabilitation Mulholland Scenic Overlooks and trailheads in the Santa Monica Mountains Zone. These overlooks are heavily used, and the native landscaping in and around high use areas tend to deteriorate as a result. Work performed included irrigation upgrades, replacement of plants, installation of mulch, reparir of fencing, and graffiti removal and coating. Work was performed at Marvin Braude, Mulholland Gateway Park, Getty View Trailhead, the Stone Canyon, Summit, Nancy Hoover Pohl at Fryman canyon, and Universal City Overlook, and other overlooks along Mulholland Drive.

Minor Capital Outlay

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The Mountains Recreation and Conservation Authority operates and manages multiple park sites and open space areas for the Santa Monica Mountains Conservancy. In order to provide high quality park experience for park visitors, minor site fixture upgrades are often necessary. These include signage, park benches, picnic tables, interpretive displays and other park amenities. Often, the funding sources available for the ongoing maintenance of parks are not sufficient to include the replacement or purchase of such items.

Temescal Canyon Improvements

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: Improvements in Temescal Gateway Park and the Temescal Conference and Retreat Center continued this year with the completion of the new utility infrastructure project. This project upgraded the electrical, gas and water service to all buildings. These upgrades have increased the safety and utility of existing structures. The infrastructure project included installing all the electrical lines underground. Ultimately the proliferation of telephone poles in the back of the canyon will be removed, thus restoring the beauty of the canyon's tree canopy.

Browns Canyon

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: Browns Canyon located in the central Santa Susana Mountains offers more wilderness elements than any other Los Angeles River tributary outside of the Angeles National Forest. The parkland includes a scenic, old gravel quarry that will soon make an ideal parking and staging area for access to open space in the numerous tributaries of the canyon. This property is the foundation for the 2,000-plus-acre Michael D. Antonovich Regional Park which was dedicated in late summer 2003. An oak lined road leads up the quarry and a network of trails lead in all directions but east. Teh property contains a spring-fed pond and surrounding mountains slopes support purple-sage dominated coastal sage scrub. The northern portion of the property provides sweeping vistas of the Santa Susana Mountains to the north and teh San Fernando Valley to the south.

Urban Outreach Strategy Project

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: The California Institute of Public Affairs (CIPA) conducted an urban outreach strategy project for the Santa Monica Mountains Conservancy. The project lead to an active role in the Fifth World Parks Congress held in South Africa in July 2003. CIPA also developed a regional structure for cooperation in greater Los Angeles, and made recommendations on how the Augustus F. Hawkins Natural Park and Temescal Gateway Park could become state-of-the-art demonstration centers for urban outreach.

Heidelberg Park

Program: Environmental Acquisition/Restoration Santa Monica Mountains Conservancy

Description: Located in the Mount Washington community near downtown Los Angeles, 18-acre Heidelberg Park provides a rare glimpse of the natural appearance of Mount Washington prior to European settlement of the Los Angeles basin. The park's steep slopes have harbored one of the best remaining examples of California black walnut woodland in all of Southern California. The walnut woodland here provides food and excellent cover for wildlife, and critical roosting and nesting sites for numerous songbirds and birds of prey. Purchased in November 2002, Heidelberg Park is the second largest natural park permanently protected by the Conservancy in the Mount Washington area, known for its twisting streets, city views and rural character. The Conservancy purchased nearby Elyria Canyon Park in 1994, with the energetic support of the Washington community.

Senior Center Landscaping - Resource Bond Yr 1

Program: Portion of support budget

Description: CCC will assist in the installation of irrigation, trees, shrubs and sod the the Chowchilla Senior Center. The center provides recreational, cultural and educational classes and activities for seniors. The center was formerly a church.

1. Project will be completed in conjunction with the City of Chowchilla and the Senior Center. The City population is 11,127 persons. The next closest city is one-half hour away and no public transportation exists between the two cities. The median household income is $30,729. The amount of persons below poverty level is 15.6%. The Chowchilla Womens Prison is within the City sphere of influence and is counted in the population.

2. The City of Chowchilla will provide the materials. They will also provide a technical supervisor to train the corpsmembers on installation of sprinkler systems, laying sod and landscaping. The City is funding the project with dollars from the general fund.

3. This project creates a positive corpsmember learning, training and education experience through the on-site training provided by the sponsor and the inclusion of related educational materials during evening classes at the Satellite.

4. Sod will be laid over an area 3000 square feet in size. Seventy-five trees and shrubs will be planted. The corpsmembers will install 800 linear feet of irrigation system.

Irrigation Fresno River Trail - Resource Bond Yr 1

Program: Portion of support budget

Description: The CCC will assist the City of Madera and local community groups in completing phase III of tree planting along the Fresno River Trail from Granada Avenue to Westberry Blvd. The Corps will be involved in installing the irrigation system between D and Granada streets before the community planting.

Madera has a population of 43,207. The largest ethnic group is hispanic (approximately 68%). The median household income is $27,370 and 33.9% of persons are below the poverty level.

The Fresno River Trail is a multi-purpose trail along the Fresno River and built under Highway 99. This is the only multi-purpose trail in the City of Madera.

1. The Fresno River is managed by multiple governmental and non-profit groups. The County of Madera manages the water way, The City of Madera manages the banks and access areas and Maderans Making a Difference, a non-profit group, assists in community awareness and activism.

The City of Madera is full of diversity. The trail spans the older section of town with homes in value of $110,000 to the area west of Highway 99 which consists of brand new homes in value of $200,000.

The river is fed from Lewis and Elder Creeks which flow down from Oakhurst.

2. The trees and materials are being purchased with funds from the Prop. 12 Urban Forestry Grant.

3. The Corpsmembers will participate in a project that will assist a community tree planting. They will assist youth and community members in enhancing the neighborhood. Corpsmembers will learn the value of urban forestry and environmental justice.

4. Corpsmembers will assist in the installation of PVC and water devices over a section one-half mile long.

Resource Bond Yr 1 - Millview Complex Landscape

Program: Portion of support budget

Description: Crew will assist with irrigation, planting trees, shrubs, and sod for the area adjacent to two newly constructed softball fields at Millview Sports Complex.

Madera has a population of 43,207. The largest ethnic group is hipanic (approximately 68%). The median household income is $27,370 and 33.9% of persons are below the poverty level.

Project will create shelter and assist with safety concerns around a recreational park.

1. The project is sponsored by the City of Madera Parks and Community Services Department. Complex is located in older section of Madera and the softball fields serve adult leagues as well as youth drop-ins.

2. Funding for materials and technical supervision is coming from City park development fees.

3. Corpsmembers will learn a variety of project and teamwork skills during the project. They will learn tree identification and propagation. Teamwork will be enhanced not only through the project but also through the purpose of the Complex.

4. Corpsmembers will plant 100 trees and plants and will install 5000 square feet of sod. They will assist with the installation of a sprinkler system.

Rotary Park Shelters - Resource Bond Yr 1

Program: Portion of support budget

Description: CCC will assist in removal of four (4) picnic shelter roofs at Rotary Park. Corpsmembers will also assist in the relocation of one shelter. Corpsmembers will remove existing roofs and refinish posts and roof joists.

The park is a multi-purpose park with recreational facilities for public use. There is also a community and habitat pond. The shelters are being moved and repaired in anticipation of additional recreational resources at the park, a skate park and other amenities.

Madera has a population of 43,207. The largest ethnic group is hispanic (approximately 68%). The median household income is $27,370 and 33.9% of persons are below poverty level.

1. The park is managed by the City of Madera with assistance from the Rotary Club of Madera. The park connects to the Fresno River Trail.

2. Project is being completed in conjunction with the City of Madera and the Rotary Club. CCC will assist in the landscaping around the skate area in a future project.

3. Corpsmembers will enhance their basic carpentry skills. The sponsor will provide a technical supervisor to instruct the corpsmembers on specific job skills.

4. Corpsmembers will move and re-assemble one shelter. They will remove the roofs, refinish the posts and roof joists on four other shelters.

South Fork Cottaneva Creek Fish Passage Improvement

Program: Salmon habitat project--DFG

Description: This project will improve fish passage at an identified barrier to adult and juvenile coho salmon and steelhead trout. By replacing a perched culvert with a railcar bridge, the project will make available approximately 1.3 miles of summer rearing and spawning habitat for coho salmon and steelhead trout and an additional 1.2 miles (total of 2.5 miles) of rearing habitat for steelhead trout.

South Branch Robinson Creek Riparian Restoration Project

Program: Salmon habitat project--DFG

Description: To keep deer out of the riparian zone by constructing two fences so that the riparian vegetation has a chance to get established which will increase canopy and decrease stream temperatures. Bioengineering structures totaling 210' will help stabilize stream banks and add future canopy to the creek. Rock deflectors will help deflect water away from unstable stream banks.

City of Fort Ord

Please Remove From Database

Program: Portion of support budget

Description: The Bureau of Land Management (BLM) properties on former Ft. Ord have been designated as Habitat Reserve. These lands have been designated as part of the reuse of the former Fort Ord, which also includes projects to enhance the economical recovery of the area.
Corpsmembers will construct and repair erosion damage on recreational roads and trails on the BLM"s Fort Ord Public Lands. Specific duties shall include, hiking to and from the project sites, rehabilitating old roads using hand tools, constructing and maintaining short trail segments, spreading seed and straw on sites to reduce erosion potential.
Corpsmembers will construct one and half miles of new trail and rehabilitate five additional miles of trail. They will also rehabilitate five acres of habitat.

Blm, Ft. Ord Trails - Resources Bond Year 1

Program: Portion of support budget

Description: The Bureau of Land Management (BLM) properties on former Ft. Ord have been designated as Habitat Reserve. These lands have been designated as part of the reuse of the former Fort Ord, which also includes projects to enhance the economical recovery of the area.

Corpsmembers will construct and repair erosion damage on recreational roads and trails on the BLM's Fort Ord Public Lands. Specific duties shall include, hiking to and from the project sites, rehabilitating old roads using hand tools, constructing and maintaining short trail segments, spreading seed and straw on sites to reduce erosion potential.

Corpsmembers will construct one and half miles of new trail and rehabilitate five additional miles of trail. They will also rehabilitate five acres of habitat.

Skyline Park Trail Work Resource Bond Yr 1

Program: Portion of support budget

Description: Skyline Park is run by a non profit organization and has always had an extremely tight budget resulting in a lack of trail maintenance throughout it's history as a public park. This bond money will allow the park to improve the trail complex and increase the safety and recreational pleasure of the visitors.

Lake Berryessa Smittle Tr. Work Resource Bond Yr 1

Program: Portion of support budget

Description: Lake Berryessa\ Bureau of Reclamation has a neglected trail system that desperately needs rehabilitaton. This project will help the Bureau with some of it's most troubled trail spots especially the Smittle Trail. Of particular need is the reconstructin of a bridge crossing. There is the feeling that this project will introduce the Bureau of Reclamation to our program and heighten the opportunity of future work at the Lake. The local community has formed a trail group to help with locating trail grants. There is a lot of interest in improving and expanding the recreational area's trail system. Our work through this grant may help us to become a vital link in the trail progression in the Lake Berryessa region. Matches Project R04-5126 for $2,467.50

Napa River Trail Restoration Project - Resource Bond Yr 1

Program: Portion of support budget

Description: Project involves the planting of various native species alongside the newly constructed trail which runs beside the west band of the Napa river between Lincoln and Trancas Avenues. The plant species and locations are designated according to the drawn plans. Plants will be installed with fertilizer, weed cloth, mulch. Trees will be protected with pole and wire barriers according to the plans. Invasive plants along the path will be cut out. This project is linked to Project R04-5124 for $8,255.

* Napa River Acquisitions

Program: River Parkways: Opportunity Grants

Description: Acquire approximately 45.7 acres of riverfront property along the Napa River. The Oxbow Preserve property includes 12.7 acres of river floodplain and native riparian habitat at a natural bend in the river in downtown Napa. Acquisition of an easement will enhance the public access for the recreational uses planned for the Oxbow property. Also part of this acquisition is the 33-acre Trancas Park property, bounded by the Napa River on the east and the Salvador Channel on the west. Its acquisition will preserve a significant riparian habitat and provide open space and future passive recreational opportunities as a trailhead staging area for the rest of the Napa River Parkway.

Award Detail

Oxbow Preserve Restoration

Program: River Parkways: Opportunity Grants

Description: Restore the 12.7 acres of the Oxbow Preserve property on a bend in the Napa River in downtown Napa. Restoration will include removal of fill and levees, removal of non-native plants, planting of riparian vegetation, and reconnection of the property to the active tidal river channel via installation of sloughs on the west side of the property. Existing oak woodland and meadow will be retained and preserved as open space while construction of an interpretive boardwalk, signage and pedestrian/bicycle trails will provide public access to more than 100,000 visitors each year.

York Creek Diversion Modification Project

Program: Salmon habitat project--DFG

Description: Improve adult steelhead passage at the York Creek Diversion Structure by cutting the diversion structure down to stream grade, filling the incised creek channel below the diversion, and constructing boulder weirs that will provide for adult passage; eliminate entrainment of juvenile steelhead into a municipal diversion while maintaining diversion operatility by replacing an unscreened diversion with an infilitration gallery below the streambed and a sump to control the rate of diversion.

Wetland Habitat Restoration, San Pablo Bay

Program: Coast wetlands - SF Bay Area

Description: The acceptance of a federal reimbursable grant from the North American Wetlands Conservation Council (NAWCC) for $837,300.00 and, secondly, to allocate funds in the same amount for a grant to Ducks Unlimited to restore and enhance 5,233± acres of seasonal and tidal wetlands at six separate locations near San Pablo Bay, in Napa and Sonoma Counties. Four of the six restoration projects are located on the Department of Fish and Game's (DFG) Napa Sonoma Marsh Wildlife Area, one on the U.S. Fish and Wildlife Service's San Pablo Bay National Wildlife Refuge, and the final site is on property owned by the Sonoma Land Trust.

Donner Memorial Sp, New Visitor Center/Museum

Program: Donner Memorial SP: New Visitor Center/Museum

Description: This project will construct a new Visitor Center/Museum on an appropriate site at Donner Memorial State Park to replace the existing facility. The new facility will be approximately 10,000 square feet in size and would provide space for updated museum and exhibit area, theater, bookstore and gift shop, artifact and general storage, staff office and meeting space, and restroom facilities. The project also includes the appropriate site work.

Improvements To The Regional Park Disc Golf Course

Program: Portion of support budget

Description: The CCC will assist the Truckee-Donner Recreation & Park District in making improvements to the Truckee River Regional Park Disc Golf Course. The visitor use of the existing 18 hole course is increasing and this use has necessitated construction\extension of a wood """"""""split rail""""""""" fence to more easily designate the course """"""""out-of-bounds""""""""" area and the construction of two """"""""cable step""""""""" access ways from the disc golf course to the Legacy Bike Trail so users can retrieve their discs from out-of-bounds areas. These improvements will protect native vegetation, reduce soil erosion, improve visitor safety, etc.

* Truckee And North Fork American Rivers Acquisitions

Program: River Parkways: Sierra Cascades

Description: Acquire in fee title up to 2,342 acres of watershed canyon lands know as Snow Mountain, Government Springs, and Big Granite, which include multiple drainages in the Wild and Scenic North Fork of the American River. This acquisition also includes two parcels along the Truckee River corridor. All the parcels contain outstanding foraging and migratory habitat for mule deer, bear and mountain lion and also provide important connectivity with other protected properties in the area.

South Yuba Acquisitions

Program: River Parkways: Yuba River

Description: Acquire approximately 735 acres of scenic land along the South Yuba River corridor established as a State Wild and Scenic River corridor by the State Legislature in 1999. Adjacent to in-holdings of existing public lands, this acquisition will expand South Yuba River State Park and provide additional river access and preserve scenic, habitat, watershed, and cultural and recreational values. Acquisition will also prevent clear cutting on these parcels.

Olinda Historic Trail

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Olinda Historic Trail Project will provide access to open space along Highway 142, between Carbon Canyon Regional Park and the Puente-Chino Hills Wildlife Corridor. The trail will originate at the Olinda Historic Museum and Park, a California State Historic Landmark, and climb 700 vertical feet through former oil company property into Orange County coastal range wilderness, south and east of Tonner Canyon. The need for a trail in the project area has been specifically identified in the City of Brea's Master Plan. Olinda Historic Trail project elements include the development of technical and design plans for a trail that would connect the site, an early twentieth-century oil town, with city-owned open space, Chino Hills State Park and additional local/regional trails. Additional planned improvements include the removal of invasive species, reintroduction of native plant materials, production of interpretive signage/brochures and the displaying of oil equipment associated with the historic use of the property.

Tonner Canyon Acquisition Project

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The ultimate goal of this project is to purchase 527 acres at the mouth of Tonner Canyon, east of SR-57 between the Puente and Chino Hills. This acquisition is a critical step in connecting the two ends of the Puente-Chino Hills Wildlife Corridor, whose 31-mile length connects the Whittier Hills with Chino Hills State Park and areas east and south. Of particular note is the fact that this property contains core habitat for sensitive and rare species, including the California Gnatcatcher, least Bell's vireo, prairie falcon, and southwestern pond turtle, and secures the passage for wildlife movement under the freeway. It would also preserve Tonner Creek, a blue-line stream, along with meadows and forests. The project is part of a planned and partially constructed multi-use trail system that runs the entire length of the Puente-Chino Hills, and would be well suited for future low-impact recreational facilities, such as an interpretive center, picnic area, and campground.

Del Obispo Storm Drain Treatment And Low Flow Diversion Project

Program: Clean Beaches Program

Description: The Project will be constructed on a City owned lot used for park facilities. The site is bounded by Del Obispo Street to the west, Del Obispo Park to the north, the SERRA wastewater treatment plant to the south, and San Juan Creek to the east. The Project design combines the urban runoff diversion with a Continuous Deflection System (CDS) filtration unit. The diversion will direct urban runoff from the Storm Drain to a nearby 12-inch sanitary sewer main. The CDS unit will prevent debris and solids from entering and clogging the sewer main. The design capacity of the CDS system is 14 cfs, to capture the first flush of the wet season runoff. The design of the Project will provide diversion capacity for 20 years from the date of initiation of construction.

Salt Creek Storm Drain Treatment Project

Program: Clean Beaches Program

Description: The treatment facility will include an ozone treatment unit, an electrical equipment room, four basket strainers, and four horizontal sand strainers. The Project will also include a concrete berm (diversion weir) along the western edge of the existing concrete apron at the outlet of Salt Creek that will incorporate a four-foot wide by two-foot high slide gate and an inlet facility to direct flow to the pump station. The Project will capture up to 1,000 gallons per minute of urban runoff, treat it, and direct it back into the Salt Creek outlet. During storm events, this facility will be bypassed. The design of the Project will provide diversion capacity for 20 years from the date of initiation of construction.

Laguna Lake Park

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The Laguna Lake Park Master Plan, Phase 2 Improvements propose to improve access, improve quality of habitat and open space, increase educational opportunities and improve accessibility of Laguna Lake open space resources to the Orange County regional trail system. Specific improvements include a new parking lot, outdoor classroom, restroom, picnic areas, fishing piers, ADA accessible walks and ramps, realignment of park trails, addition of retaining walls and new landscaping and irrigation. The project improves a public open space resource, promotes stewardship of landscape through interpretive educational kiosks, and provides enhance accessibility to the access to trails.

Laguna Beach And Laguna Main Beach Storm Drain Pollution Control Projects

Program: Clean Beaches Program

Description: The proposed Projects include the construction of eight urban runoff diversion/separator units in high priority storm drain outlets that flow to the ocean. Urban runoff from these storm drains will be diverted to South Orange County Wastewater Authority's sewer system. The designs include flow control valves that allow nuisance, non-storm runoff to be diverted to the sanitary sewer system year round. In addition, the designs include continuous deflection separator units for removing trash, sediment, organic matter and floatables that might clog the sanitary sewer line. The Projects are expected to improve coastal water quality, reduce the number of dry weather beach warnings and closures, and protect public health for a period of at least 20 years.

Orange County Division Of League Of California Cities Open Space Opportunities

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: The RMC has recommended 31 projects in Orange County for the Workprogram, however RMC lacks the personnel needed to discern potential projects and to identify priority projects for the region. This critical gap can be solved with the assistance of the OCD in identifying projects that enhance open space, habitat, low impact recreation, watershed improvements and environmental education.

City of Seal Beach

City Of Seal Beach Open Space Opportunities

Program: Environmental Acquisition/Restoration San Gabriel/Lower LA River Conservancy

Description: This project will allow a thorough investigation of open space opportunities, interested partners, property owner information, and significance to regional trails, recreational opportunities, as well as habitat value. Additionally, this study will provide the city an opportunity to evaluate storm drain infrastructure and water quality improvement projects, and how they can be linked to open space and habitat improvement opportunities.

Chino Hills Sp, Coal Canyon Biological Corridor Restoration

Program: Chino Hills SP: Coal Canyon Biological Corridor

Description: This project will improve the function of a major regional habitat linkage at Coal Canyon to increase the exchange of plants and animals between Chino Hills State Park and the Santa Ana Mountains. This action will help prevent local and regional species extinction. A habitat restoration plan will be developed and implemented. It will include landform restoration, re-vegetation, and project monitoring.

Ccc Park Bond North Fork American River Trail

Program: Portion of support budget

Description: The purpose of this project evaluation is to show a match in labor. Placer County Parks and Grounds Division is providing reimbursement for labor, and the CCC will provide a dollar for dollar match in labor from Park Bond allocations.
Project 04-1512

As part of the park bond project funding for the fiscal year 03-04, the CCC Placer Center resource crews will be working on the North Fork American River Trail. This trail is one segment of what will be known as the Capitol to Capitol Regional Trail. The Capitol to Capitol is a 200 mile long trail that will connect the California capitol in Sacramento to the Nevada State capitol in Carson City. This trail will connect existing trails such as the American River Parkway in Sacramento County, the Pioneer Express Trail in the Folsom Lake State Recreation Area, the Tahoe Rim Trail around the west shore of lake Tahoe, and the Kings canyon Trail to Carson City.

The North Fork American River Trail Project is phase 1 of the Capitol to Capitol Regional Trail Project, and is 14 miles long of mostly new construction. This construction involves development of trail heads at the American River confluence and another on at the Ponderosa Bridge. This project requires the kind of technical trail building performed by backcountry trail crews, the construction will include 35 rock walls, four bridges, and over 12 miles of new construction.

Placer County estimates the North Fork American River Trail Project will take 164 weeks (3 plus years) for a 12 person crew, working 7 hour days to complete the project.

This project has a trail advisory group made up of the following affiliates: Sierra Club; Meadow Vista Trails Association; Forest Hills Trails Alliance; Western States Trail Foundation; Protect American River Canyon; FATRAC; and California State Parks.

Truckee River Outlet Trail

Program: River Parkways: Opportunity Grants

Description: Construct a trail connection and river crossing on 0.9 acres along the Truckee River in Tahoe City. Project will connect the West Shore and Truckee River Trails with Tahoe City. Roughly one-half of the trail crossings and connections run along the Truckee River. The project includes a trail, two large plaza areas, benches and large seating walls, river overlooks, bicycle parking, interpretive signage, parking, extensive drainage improvements, and over 350 linear feet of riverbank stabilization and native re-vegetation along the lakeside of this property. Other partners in this $2.5 million project are the California Tahoe Conservancy, State Parks and the North Lake Tahoe Resort Association.

Auburn To Cool Trail Crossing

Program: River Parkways: American River

Description: Planning, design and construction of a trail crossing on the North Fork of the American River within Auburn State Recreation Area. As a result of the American River Pump Station/River Restoration Project, the restored river will divide the Auburn-to-Cool Trail, which is currently used by an estimated 3,500 visitors per year. The State will use the grant funds to plan and implement a trail bridge or other crossing of the North Fork American River.

* Truckee And North Fork American Rivers Acquisitions

Program: River Parkways: Sierra Cascades

Description: Acquire in fee title up to 2,342 acres of watershed canyon lands know as Snow Mountain, Government Springs, and Big Granite, which include multiple drainages in the Wild and Scenic North Fork of the American River. This acquisition also includes two parcels along the Truckee River corridor. All the parcels contain outstanding foraging and migratory habitat for mule deer, bear and mountain lion and also provide important connectivity with other protected properties in the area.

California Engels Mining Company

Program: Forest resource improvement projects

Description: This project is located in the Lights Creek drainage in Plumas County. Several hundred acres are overstocked with submerchantable-sized conifers. This project of thinning reduced stand stocking to provide for a healthy, faster-growing timber stand and reduced fire hazard. The thinning was done manually, using chain saws to remove suppressed, damaged and sub-dominant trees.

Murrieta Creek Flood Control, Environmental Restoration & Recreation

Program: River Parkways: Opportunity Grants

Description: Acquisition of right-of-way easements and land as part of a $90 million project being undertaken by the U. S. Army Corps of Engineers and the cities of Murrieta and Temecula to create a multi-use greenbelt channel, including a 220-acre multi-use detention/sedimentation basin featuring 160 acres of rehabilitated and developed wetlands. The westerly bank will have trails to accommodate equestrians and the easterly bank will have trails to accommodate bicyclists and pedestrians.

Leland Stanford Mansion Shp, Grounds Rehabilitation

Program: Leland Stanford Mansion SHP: Rehabilitation of Mansion Grounds

Description: This project provides for the rehabilitation of the grounds and rehabilitation/reconstruction of outbuildings within the Leland Stanford Mansion State Historic Park. This work on the mansion environs will result in a unified setting representative of the Stanford Era, which is the primary period of significance of the park unit and National Register listing. The environs will be developed appropriate for adaptive use for both protocol and public events and will be designed to meet the Secretary of Interior's Standards.

Railroad Technology Museum, Rehabilitate Two Shop Buildings

Program: Railroad Technology Museum: Rehab Two Shop Buildings

Description: This project will provide for the rehabilitation of two historically significant structures within the existing Union Pacific Rail Yard Buildings Complex in downtown Sacramento. The buildings will provide the California State Railroad Museum with adequate maintenance and storage facilities to house and protect its collection of historic rolling stock. This proposal also funds a comprehensive Facilities Plan to guide the development of five Union Pacific buildings to house the Railroad Technology Museum.

Two Rivers Trail

Program: River Parkways: Opportunity Grants

Description: Acquisition of land and right-of-way easements along the south side of the American River in Sacramento and construction of a 2.5 mile pedestrian and bicycle trail from Tiscornia Park at Richards Boulevard and Interstate 5 to Sutter's Landing Park at 30th Street and B Street. This project will connect the American River Parkway and associated regional trails to the Sacramento River Parkway.

Jibboom Street Park Phase Ii

Program: River Parkways: Opportunity Grants

Description: Construction of a new river park encompassing approximately 4.6 acres on the east side of the Sacramento River at Jibboom Street in the City of Sacramento. The project, which is situated on the north and east sides of the historic PG&E Building, will provide access to the Sacramento River Parkway's regional bicycle trail and include grading and fill of the park site to levee height to allow improved public access and views of the river and the creation of open space, planting of native vegetation along the river's edge, creating a large group picnic area and parking lot and providing disabled access to the river.

Sacramento Valley Oak Woodlands Public Outreach And Education

Program: WCB acquisitions and restorations

Description: A grant to the Sacramento Valley Conservancy (SVC) for an oak woodland public education and outreach project designed to communicate the social, economic, agricultural and biological benefits associated with the conservation of oak woodlands in the eastern and southern areas of Sacramento County and the nearby areas of El Dorado and Amador Counties. Designed to reach local landowners, this project will utilize the 4,000 acre, Deer Creek Hills Ranch, as the “classroom” to demonstrate how oak woodlands and rangeland can be protected in an economically viable and sustainable manner.

City of Chino Hills

Chino Hills Sp, Entrance Road And Facilities

Program: Chino Hills SP: Entrance Road and Facilities

Description: The project will improve service to the public and allow formal access to Chino Hills State Park by providing a new entrance road and associated infrastructure. The project will include development of approximately 2 miles of a safe “all weather” entrance road, retaining walls, road drainage facilities, a park entrance station, utilities, a scenic overlook, erosion control, a multi-use path, a maintenance facility, comfort station, trailhead and intersection improvements.

Palomar Mountain Sp, Rehabilitate Boucher Lookout Tower

Program: Statewide Minors: State Park Systems

Description: This project will preserve, restore and rehabilitate the existing historic fire lookout tower at Boucher Hill, to allow public access and interpretation of the state's role in protecting life, property and natural resources from devastating wildland fires. The project will make the building safe for public use, while identifying and preserving its character-defining historic features. The project will also provide needed restroom facilities at the site.

City of Stockton

City Of Stockton Pk Improvement - Resources Bond Yr 1

Program: Portion of support budget

Description: Project consists of three elements:
1. Installing 60 Slant Top Barrel recycling bins and replacing 60 signs in various city parks. This will increase the public's awareness of the importance of recycling.

2. Under the 'Tree City USA' program crew will plant @ 750 native and non-native species in various city parks.

3. Rebuild backstops in 7 city parks; and horseshoe pits in 9 parks.

The project will be partially funded through Resource Bond allocations The total amount contributed by CCC will be $22,000.00 This will provide 3 weeks crew work. The total cost for the project will be $53,000.00. The remainder of funds will be matched by the sponsor. The remainder will be funded by the City of Stockton.

City of Nipomo

Nipomo Land Conservancy Open Space Resource Bond

Program: Portion of support budget

Description: This is the first phase to create an open space in the town of Nipomo. The property is owned by the Land Conservancy of SLO. The area is bordered by Nipomo Creek. This is a annual project area where CCC crews have assisted in a community wide creek clearance project. The intent of the Land Conservancy is to maintain a native open space area for the public to view native plants and wildlife. The CCC will provide labor to install approximately 600 ft of split rail fence. The Land COnservancy will provide the materials as a match from grant money. Project 04-7788

Bishop'S Peak Trail Resources Bond Yr 1

Program: Portion of support budget

Description: The Bob Jones Trail is a bicycle and hiking trail which currently runs from the junction of Highway 101 and San Luis Creek and runs parallel to the creek for approx. 4 miles ending in the community of Avila Beach. As part of a long-planned regional transportation plan, the new section of trail will run from the southern edge of San Luis Obispo about 6 miles to connect with the current trailhead for a total 10 mile long bicycle trail connecting the City with the ocean. This new section will provide a healthy and safe alternative to automobile transportation. Avila Beach is a popular summer destination for all citizens of San Luis Obispo as well as tourists. This specific leg of the trail will begin at Prado Road and will parallel San Luis Creek 1 mile to Los Osos Valley Road. Work will include brushing, erosion control, retaining wall and fence construction, and site mitigation including the planting of native species.

This specific leg of the trail will begin at Prado Road and will parallel San Luis Creek 1 mile to Los Osos Valley Road. Work will include brushing, erosion control, retaining wall and fence construction, and site mitigation including the planting of native species.

This project is part of the San Luis Obispo Circulation Plan and the SLO Council of Governments Regional Transportation Plan. Additional funding includes a $ 500,000 grant from SLOCOG and a $ 200,000 grant from Fish and Game to protect the riparian corridor along San Luis Creek.

Project 04-7524

Barton Neighborhood Park Resource Bond Yr 1

Program: Portion of support budget

Description: CCC will assist the City of Lompoc in creating a neighborhood park in an underserved and underfunded area of the county. The park will be a 5.12 acre family park with a walking path, playground, horsepits and basketball court. The regulation basketball court will be donated by Saturn of Santa Maria. The project is part of City Resolution No. 4873(00). The city has received numerous letters from area children requesting the construction of the park as it had been promised to the neighborhood in 2000. CCC will be working with the City employees in all aspects of the park construction. This project resulted from last years Park Bond project involvement (03-1120) and this years reimbursement project 04-7765 is part of the city of Lompoc's awarded Trees for the Millenium grant.

Ymca Family Park Resource Bond Yr 1

Program: Portion of support budget

Description: The CCC will work with the Santa Maria Valley YMCA to construct a family park. The park will be in the open dry field between the main facility and the skate park and soccer arena. The family park will provide safety and security with the use of landscaping and shade. The park will encourage increased use of the area for families of the youths currently using the skate park and soccer arena. The YMCA's mission ""to build strong kids, strong families and strong communities,"" is a perfect match to the mission and goals of the CCC. The use of Park Bond funds to match the two grants YMCA has already received from other sources assists with providing services to an underserved area of the county. The YMCA is used by the corpsmembers and their families.

Big Basin Redwoods Sp, Wastewater Collection & Treatment, Phase Ii

Program: Big Basin Redwoods SP: Wastewater Collection and Treatment

Description: This project will implement additional measures to rehabilitate the Big Basin wastewater treatment plant and replace/improve the existing laboratory/office facility. The project will rehabilitate the trickling filter, improve primary and secondary clarifiers, add an automated monitoring and alert system to key processes, re-plumb some plant components to provide more flexibility in plant operations, and improve the existing laboratory and office facilities. This project will increase the reliability of meeting discharge standards and laboratory reporting requirements.

Resource Bond Yr 4: 2004 Big Basin Trail

Program: Portion of support budget

Description: The 2004 Backcountry Crew will spend 3 weeks working at Big Basin State Park repairing extensive winter storm damage on the Sunset and Skyline-to-the-Sea Trail. The crew will also construct a pre-fabricated 60' seasonal bridge across Waddell Creek and a 100' bridge across another drainage. The project will also require the crew to repair winter storm damage on the Timms, Howard King, and McRary Ridge Trails.

Big Basin State Park is in Santa Cruz County, and encompasses one of the finest remaining old growth redwood forests in the region. Over 4 million people live within a 2-hours drive, and make full use of this remarkable recreation area. The work our crew does is crucial to preparing the trail system for safe public use before the majority of visitors arrive. By addressing erosion problems on the trails, our work also contributes to the protection of the Waddell Creek Watershed, helping to ensure its viability for the anadromous fish that still ply its waters.

The California Department of Parks and Recreation is providing all the necessary tools, equipment, commissary gear, and technical supervision and support to help the crew achieve its work objectives. They are also providing a partial cash reimbursement for the work ($5,000)..

Representatives from other local California corps will be participants on the crew. The crew is also being sponsored by AmeriCorps which will provide each member with a $2,362.50 education award at the completion of 900 hours of service.

Resource Bond Yr 4: 2004 Big Basin Trail Repair

Program: Portion of support budget

Description: The 2004 Backcountry Crew will spend 3 weeks working at Big Basin State Park repairing extensive winter storm damage on the Sunset and Skyline-to-the-Sea Trail. The crew will also construct a pre-fabricated 60' seasonal bridge across Waddell Creek and a 100' bridge across another drainage. The project will also require the crew to repair winter storm damage on the Timms, Howard King, and McRary Ridge Trails.

Big Basin State Park is in Santa Cruz County, and encompasses one of the finest remaining old growth redwood forests in the region. Over 4 million people live within a 2-hours drive, and make full use of this remarkable recreation area. The work our crew does is crucial to preparing the trail system for safe public use before the majority of visitors arrive. By addressing erosion problems on the trails, our work also contributes to the protection of the Waddell Creek Watershed, helping to ensure its viability for the anadromous fish that still ply its waters.

The California Department of Parks and Recreation is providing all the necessary tools, equipment, commissary gear, and technical supervision and support to help the crew achieve its work objectives. They are also providing a partial cash reimbursement for the work ($5,000)..

Representatives from other local California corps will be participants on the crew. The crew is also being sponsored by AmeriCorps which will provide each member with a $2,362.50 education award at the completion of 900 hours of service.

San Lorenzo River Parkway Trail

Program: River Parkways: Central Coast Rivers

Description: Construction of a pedestrian/bicycle trail along the San Lorenzo River from the Riverside Bridge to Laurel Street, which will connect existing trails on either side of the river to make a 5-mile loop. The project will provide a bank stabilization wall to control erosion, planting native vegetation in the stream and along its banks to improve wildlife habitat and a recreational trail along the river's edge. This project is the final phase of a larger $60 million San Lorenzo Flood Control and Environmental Restoration project being undertaken by the City of Santa Cruz and the Army Corps of Engineers, which will repair erosion damage and reduce flooding risks by restoring the river's course where feasible.

Please Remove From Database

Program: Portion of support budget

Description: Corpsmembers will work with the City of Watsonville staff to restore the native environmentally important wetlands along the newly created recreational trail around Watsonville and Struve Slough. The trail construction is being contracted out.
Corpsmembers will remove non-native trees and shrubs on approximately 2 acres. They will then replant the are, 7,700' x 10' with native plants. Corpsmembers will then install a 1600 foot drip irrigation system to water the native plants until they are established. We will install a 2,200 foot post and wire fence. The fence will be installed between the private land owners and the wetlands. We will also install interpretive signs. Corpsmembers will also install 6 feet wide, 40 foot long wooden stairway from Hope Park down to the Upper Struve Slough Trail.

Sturve Slough Restoration - Resources Bond Yr 1

Program: Portion of support budget

Description: Corpsmembers will work with the City of Watsonville staff to restore the native environmentally important wetlands along the newly created recreational trail around Watsonville and Struve Slough. The trail construction is being contracted out.

Corpsmembers will remove non-native trees and shrubs on approximately 2 Acres. They will then replant the area, 7,700' X 10'), with native plants. Corpsmembers will then insatll a 1500 foot drip irrigation system to water the native plants until they are established. We will install a 2,200 foot post and wire fence. The fence will be installed between the private land owners and the wetlands. We will also install interpretive signs. Corpsmembers will also install 6 feet wide, 40 foot long wooden stairway from Hope Park down to the Upper Struve Slough Trail.

Details concerning the number of plants, and the number of signs to be installed still need to be determine, based on availability.

The project is part of a Wetlands Trail project that has been approved by the Watsonville City Council. The project includes 5.8 miles of trail that will line both Watsonville and Struve Slough. The Watsonville wetlands system is one of the largest wetlands systems on the Central Coast. The newly constructed trails will be used by the city's education programs to educate visitors on the history of the Ohlone people and the importance of environmental protection.
The new trail will provide an area for people to exercise or use alternative forms of transportation to get from one side of Watsonville to the other.
As part of the project the Bay Breeze housing development has already begun construction of part of the trail system that runs along the ridge between the housing area and Struve Slough.
Originally planned using a global positioning system to determine initial trail alignments and a geographical information system to generate informational maps, the trails are reportedly as environmentally friendly as possible and should decrease foot traffic into sensitive areas by providing an established alternative route.

CCC will enter into a reimbursement agreement with the City of Watsonville to match the Park Bond. Project #04-4017, for Forty Seven Thousand Seven Hundred and Sixteen Dollars and Fifty cents, $47,716.50.

Tammy Stolzenthaler City of Watsonville's Environmental Educator, Jay Morse Muir Charter School teacher and Jim Teegardin CCC Corpsmember Development Coordinator will work together to develo... (Max 2500 characters returned. For full description, use website download feature.)

Please Remove From Database

Program: Portion of support budget

Description: Swasey Drive trail work will consist of tread improvement, water bar construction, and brushing. Work may involve the use of chainsaws and brush cutters to remove vegetation from the trail alignment, and digging out root wads and rocks, fixing drainages or install french drains where needed. Maintaining a relatively flat trail bed using handtools may be used prior to trail excavator work. The crew will improve the trail tread by installing trail drainages devices such as culverts or rock crossings

Turtle Bay Prop 40

Program: Portion of support budget

Description: Crews will be restoring important and environmentally sensitive lands back to a natural state. This will include preparing sites for planting of native plants, provide access to an area so a trail can be built next to the Sacramento River and connect to the new Sun Dial Bridge and join the Sacramento River Trail.
Project 04-3528

The crew will clear for a fuel brake, restore storm damage, remove limbs and spread mulch to deter invasive non-native plants.

Big Bend Ranch/Azevedo Cfip Project

Program: Forest resource improvement projects

Description: The landowner had recently purchased this property which was part of a larger holding that had been managed primarily for livestock with some timber harvesting as recently as the late 1990s. Very little had been done to manage the conifer regeneration for future timber production. The goal of the landowner is to ensure that timber develops on a normalized timeline and in balance with the site potential. Planting of a conifer mix that includes Douglas fir and a sampling of redwood. Thick pockets of natural regeneration have been thinned and chemical treatments of brush occurred where the brush was competing with advanced conifer regeneration. Several pond areas were enhanced for wildlife habitat including planting desirable vegetation and building next boxes.

Carter Meadows Trail Complex Resource Bond

Program: Portion of support budget

Description: Crews will be doing trail restoration on several trails in the Carter Meadows area. They may include the PCT, big gulch trail and the gulch trail. Work will include brushing, water bars, tread work, and some rock work. Crew will be camping at Carter Meadows Camp ground. USFS will provide technical assistance and daily oversight. This is a wilderness area and no power equipment is all allowed on the trail.

Pct Section O Trail Spike - Resource Bond 03/04

Program: Portion of support budget

Description: This project is a major collaborative effort between the United States Forest Service (USFS), the Backcountry Horsemen of California (BHC), the Pacific Cres Trail Association (PCTA), and the California Conservation Corps (CCC). Each group has a integral role in making this project happen.

The CCC will provide labor and equipment that will be necessary to perform trail improvements on the O section of the Pacific Crest Trail. This area is located between Peavine Creek and Interstate Highway 5 a distace of 68 miles on the Shasta Trinity National Forest. The scope of work will include, but not limited to, brush cutting, logging out, loose rock removal, slide rehab, and slugh and berm removal.

USFS will provide work specifications, funding, maps of specific areas, and a contact person for supervision, inspection and additional information.

The BHC will pack in gear and supplies if necessary, scout the trail for work areas, provide technical assistance, and support with educational opportunities for the Corpsmembers.

PCTA will provide meals for all participants working on the project, assistance with trail work, and support with educational opportunites for the Corpsmembers.

USFS will be billed for actual costs up to $25,000 for the first 2 spikes, and the remaining 2 spike will be funded by the CCC through Park Bond funds.

Benicia Park Native Plant Trail Resource Bond Yr 1

Program: Portion of support budget

Description: This project involves the building of a trail through and around the Forest Deaner Native Plant Botanic Garden located at Benecia State Park. The main part of the trail will be 5' wide by 1,650' long. An entrance trail 8' wide and 120' long will be constructed. The entrance trail will be covered with 5 inches of 3\4 of base aggragate rock with a 1 inch cap of ddecomposed granite. The main trail will receive 3 inches of 3\4 base agragate rock with a 1 inch cap of decomposed granite. A 35' turnpike will be constructed a layer of geotextile fabric layed out with a layer of 3 to 4 inches rock on that, another layer of geotextile fabric and then a 3' layer of rock agragate on that. This turnpike trail will be bordered with 8 to 10 inches rock.

Solano County Belden Plant/Lake Resource Bond Yr 1

Program: Portion of support budget

Description: Project involves the installation of 440 gallon containers into the area around the Belden Landing parking lot. Plants will be installed with fertilizer, water retention gel, mulch and a water berm. Various grass seed will also be planted with soil amendment added. Some other exotic plant removals may also be called for. There may be some repairs needed at facilities located at Lake Solano and Sandy Beach. This project is linked to R04-5132 for $3000.

Prince Memorial Greenway – A Street To Santa Rosa Avenue

Program: River Parkways: Opportunity Grants

Description: The Prince Memorial Greenway is a 10-acre, 4,000 linear foot park on Santa Rosa Creek in Santa Rosa. This project, which is part of Phase 5, includes removing debris and concrete grouted lining along the trapezoidal creek channel, constructing a retaining wall to expand creek bed, installing storm drains, boulders and gravel along the creek bottom, planting native vegetation along the creek's banks and bottom between "A" Street and Santa Rosa Avenue, installing lighting for pathway and bridge, constructing a pedestrian bridge and a path on the south side of the creek.

Keiser Park Renovation Windsor Resources Bond

Program: Portion of support budget

Description: The CCC to assist with the developement and preservation of the recently aquired Keiser Park. The Keiser Park Expansion will become a public treasure in that it will expand the Town Of Windsor's Parks System to incorporate a connector trail to the local highschool,create an enhanced riparian cooridore and allow for future park developement and expansion.

The corpsmebers will participate in the construction of exclusionary fencing to protect historic sites prior to arceologic review. Corpsmembers will install residential gates,barb wire boundry fences, trail gates, signage and boundry markers. The CCC total contribution to the project will be 1796 person hours.

The corpsmembers will also participate in fire hazard mitigation. Corpsmembers will remove large woody debris, prune and brush trails and roads,remove fallen trees and branches.

Additionaly the crew will assist with the restoration of other areas of the park. This work will entail installation of native materials for vehicle control and access and other improvements to campsites, roads, day-use areas,spring boxes, group picnic areas and swimming and fishing areas. Areas.

(1) Project is part of a regional or watershed based initiatives.....
Hood Mountain Regional Park is a unique wilderness park set in the Mayacamas Mountains five miles east of the city of Santa Rosa. The property is adjacent to Sugarloaf Ridge State Park which includes the recent McCormick Ranch addition and is located in unincorporated land in Sonoma County. Together the parks encomass over 5500 acres of protected wild land in the headwaters of Santa Rosa Creek. Other supporting agencies are the Sonoma County water agency, California Department of Fish and Game, Coastal Conservancy, Sonoma County Agriculture Preservation and Open Space District, and Califonia State Parks.

(2) Project is leveraged with other sponsor or third party funding sources... This project is being matched with funds from the Sonoma County Parks Dept. The Sonoma County Parks Department received funds for the purchaseof this property and this funding is being levered with our funding.

(3) Project creates a positive corpsmember learning, training and education experience, facilitated by a strong integration between the district's corpsember development and project units..... The sponsor will assist the instruction of corpsmembers in the significance of the project, the historical background, plant identification, fire miti... (Max 2500 characters returned. Tyrone Road Bridge At Tyrone Gulch

Program: Salmon habitat project--DFG

Description: Improve fish passage in Tyrone Gulch a tributary to Dutch Bill Creek, by removing twin culverts and installing a 22' wide by 30' long, pre-cast steel beam-concrete deck bridge supported on driven pilings. Stream bank erosion control and re-vegetation will be installed to reduce construction impacts.

Mark West Creek Instream Restoration Project

Program: Salmon habitat project--DFG

Description: Install a deer and cattle exclusionary fence encompassing approx. 3,700 feet. Other objectives will include planting native vegetation to the area around the riparian zone to create greater canopy and to also add instream structures such as cover logs, J-hooks, baffles, and boulder wing deflectors to create more suitable habitat for the native species of salmonids in Mark West Creek.

Tuolumne River Regional Park - Gateway Parcel Development

Program: River Parkways: Tuolumne River

Description: The Gateway Parcel Development project is Phase 1 of a multi-phased plan to develop an 87-acre parcel into a passive recreational area. Phase 1 includes creating floodplain terraces to revitalize the Tuolumne River's riparian habitat, planting native vegetation including trees, shrubs and grasses and installing an irrigation system.

Development of the Gateway parcel is part of the Tuolumne River Regional Park Master Plan, a long-range plan for a riverfront park south of Downtown Modesto spanning approximately seven miles (generally bounded by Mitchell Road to the east and Carpenter Road to the west).

West Low Gap Trail Spike Usfs Prop 40

Program: Portion of support budget

Description: A trail crew from Shasta Cascade will perform trail rehabilitation on a the West Low Gap Trail. Crews will hike up to 4 miles to the work location. The trail is in need of brushing, tread work and logging out as needed. This area is in the wilderness and the sponsor is seeking approval for use of chain saws. If approval is not obtained, crews will use cross cut saws to remove trees.

Sponsor, Ken Graves will meet crew at the Wildwood store and go to the trail head together.

$15,000.00 of Prop 40 funds will be allocated to pay for this spike. USFS will not be billed.

Homer Ranch Acquisition

Program: River Parkways: Sierra Cascades

Description: Acquire 1837 acres, including 1.5 river miles, along lower Dry Creek. Property contains unique habitat values and a year-round stream. This acquisition will allow visitors a rare opportunity to experience one of the area's waterways in the foothills through guided tours, bird watching, and other educational programs, and saves from gravel mining the largest sycamore alluvial woodland in the Sierra Nevada.

Award Detail	
Amount:	$1,000,000.00

Tulare County Youth Corps Headquarters

Program: Assistance Grants to local corps for capital outlay projects

Description: This grant will be used for the acquisition and development of the Headquarters, Learning Center and logistical support area for the Tulare County Conservation Corps (TCCC). Components of the acquisition include staff offices, warehouse and workshop facility, five classrooms/meeting rooms, a computer lab, a Corps-to Career Resource Room, and a secure parking area for vehicles and equipment.

The TCCC is a local non-profit engaged in employing young people to provide public service and conservation work, while facilitating their educational and career development and is affiliated with the Community Services Employment and Training program of Tulare County.

Wildwood Creek Restoration Resources Bond Year 1

Program: Portion of support budget

Description: Site Description - Wildwood Creek flows through Wildwood Park, which encompasses 1,754 acres of open space in the nothwest portion of the City of Thousand Oaks. The Creek is one of the tree major drainages in the City. The project area is apporximately 2.5 linear miles of riparian habitat that varies in width from approximately 20 to 50 feet.

Wildwood Mesa and the volcanic outcrop of Mount ClefRidge lie to the north of the Creek, which formed Wildwood Canyon through years of erosion. Wildwood Park contains an extensive trail system that provides visitors access to the ridge, mesa, canyon and river. Once to the river, trail users can hike along its lenght; visit the waterfalls or one of the five picnic areas alongside the Creek.

Wildwood Creek runs through a variety of vegetation types, ultimately joiningthe Arroyo Conejo in Hill Canyon. Plant communities that exist along the stream corridor include southern oak woodlan, riparian woodland, chaparral, California grassland, freshwater marsh. Native plants such as willowsand coast live oaks flourish along the creek and two rare plants; Conejo Buckwheat, and Conejo Dudleya; can be found adjacent to the Creek.

Project Description - The goal of this project is to remove the population of fan palms (Washingtonia filifera and Washingtonia Robustus). These species are non-native, and ae beginning to establish themselves in Wildwood Creek, one of the principal perennial streams in Thousand Oaks. Because this specie is not thoroughly established in this creed, the project affords an oppertunity to remove them with minimal disturbance to native plants along the stream corridor.

Removal Mehthods - Washingtonia fan palms will be felled and cut into manageable pieces, which will be removed from the site completely. Removal of sections of palms from riparian locations will be done by hand, to dirt access roads located within Wildwood Park. From there, the palms will be removed by truck.

Ecological Benefits - Wetlands andthe riparian lands that tyipcally border them are one of the most biologically productive habitats in Californai. They provide important breeding grounds for waterfowl and are essential water source for wildlife. In addition to valuable habitat, these lands protect water quality by reducing runoff, allowing groundwater recharge, and helping to control flooding. The loss of 90% of Southern California's wetlands has dramayically reduced the natural ability of water bodies to filter impurities... (Max 2500 characters returned. Santa Paula Creek Restoration

Program: Salmon habitat project--DFG

Description: Restore native So. CA Steelhead habitat 100' upstream from Harvey Dam Fish Ladder to enable increased Steelhead survival in upper reaches of Santa Paula Creek. Remove permanent pump sump and replace with removable, seasonal, fish-friendly (screened) irrigation pump. Also, restore and stabilize 100' section of stream bank with native vegetation and rock.

Award Detail	
Amount:	$19,579.00
Project Types:	Open Space, Habitat, Recreatn Imprvmnt
